Role expiration

Permissions     Roles

❌ There is a security update available for your version of Drupal. To ensure the security of your server, you should update immediately! See the available updates page for more information and to install your missing updates.
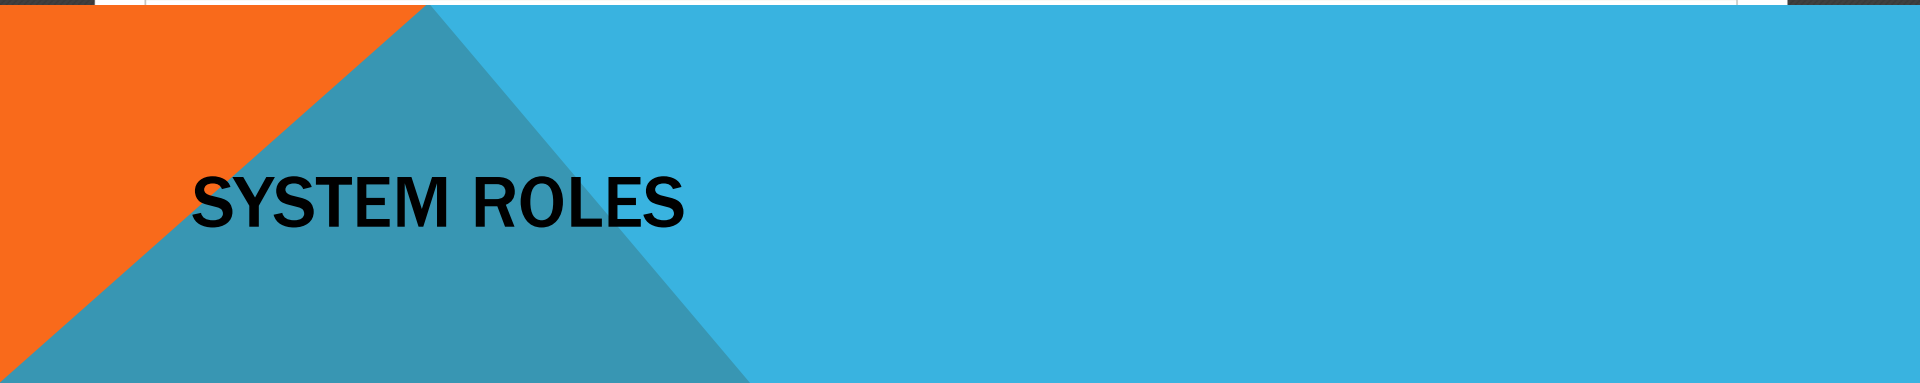

Roles allow you to fine tune the security and administration of Drupal. A role defines a group of users that have certain privileges as defined on the permissions page. Examples of roles include: anonymous user, authenticated user, moderator, administrator and so on. In this area you will define the names and order of the roles on your site. It is recommended to order your roles from least permissive (anonymous user) to most permissive (administrator). To delete a role choose "edit role".

By default, Drupal comes with two user roles:

- Anonymous user: this role is used for users that don't have a user account or that are not authenticated.
- Authenticated user: this role is automatically granted to all logged in users.

Hide row weights

| NAME | WEIGHT | OPERATIONS | |
|------|--------|-----------|---|
| anonymous user (locked) | 0 | | edit permissions |
| authenticated user (locked) | 1 | | edit permissions |
| individual member – STUDENT | 2 | edit role | edit permissions |
| individual member | 3 | edit role | edit permissions |
| organisational member – BRONZE | 4 | edit role | edit permissions |
| organisational member – SILVER | 5 | edit role | edit permissions |
| organisational member – GOLD | 6 | edit role | edit permissions |
| organisational member – PLATINUM | 7 | edit role | edit permissions |
| moderator | 8 | edit role | edit permissions |
| administrator | 9 | edit role | edit permissions |
